

## Pedestrian Safety Tips

- Always cross the street at a signalized intersection or at a marked crosswalk.
- Dress to be seen. Brightly-colored clothes and reflective material at night make it easier for drivers to see you.
- Always walk on the sidewalk. If there is no sidewalk and you have to walk in the road, always walk facing traffic, so you can see oncoming cars.
- Do not assume drivers see you. Make eye contact.
- Stop at the curb or the edge of the road.

## Bicycle Safety Tips

- Always ride with traffic on the road. Use the right lane and obey traffic signals and stop signs.
- If you ride on the sidewalk, do so in a safe and courteous manner.
- Make your intentions clear to motorists and other road users. Ride in a straight line and don't swerve between parked cars. Signal your intention to turn, and pay attention to cars and pedestrians.
- Ride where drivers can see you; wear bright clothing. Use front and rear lights, and make eye contact with drivers.

## Motorist Safety Tips

- Stop for pedestrians at crosswalks.
- Slow down and obey the posted speed limit.
- Be careful when passing stopped vehicles.
- Allow 3 feet of clearance when passing bicyclists.
